

**South Central District Fire School**  
**September 25, 2010**  
**Parkston High School – Parkston, SD**

**GRAIN ENTRAPMENT/RESCUE** – 6 hrs – Instructor is Paul Schrek with Grain Elevator and Processing Society Education Program Committee, and FF/EMT with the Mitchell FD.

The class will review the hazards of flowing grain, victim survivability, how to access and free a victim, how to enter a bin safely, pre-planning at local grain facilities, hands on evolution and demo of the rescue tube and what if you don't have a rescue tube? The class will involve basic ropes and knots, so refresh your skills prior to the class.

Coveralls or wild land PPE will be adequate with hand, eye, hearing and head protection – NO loose or torn clothing – lace up boots and dust masks recommended.

**VENTILATION PRACTICES** – 6 hrs – Instructor is Brian Baldwin

The class will provide information and procedures of performing hydraulic and mechanical ventilation, with emphasis on positive pressure ventilation. Full structural PPE, and SCBA is required.
